THE BAYFIELD APPLE COMPANY CREW

Summertime at the Orchard

Hello to all our wonderful CSA customers!

We are so glad that you are a part of the Bayfield Foods CSA. Bayfield Apple Company takes great pride in supplying you with fresh fruit, seasonal veggies, and pastured pork.

The Bayfield Apple Company is a diversified, sustainably-managed orchard and berry farm, located in the famous "fruit loop" of Bayfield, WI. We primarily grow apples but also grow asparagus, pears, strawberries, cherries, blueberries, red currants and more. We have a small veggie garden which has a random rotation of vegetables and each season we raise pigs (that love having apples as part of their diet)!

We are always growing and adding more to the orchard, as the pigs work more fields for us to plant. For most of the fruit season we grow the majority of the fruit for the CSA fruit boxes, but also have other farms in the fruit loop - Hauser's Orchard, Rocky Acres Berry Farm and Apple Hill Orchard that contribute.

Last year we picked 921 quarts of strawberries and provided 835 quarts for the

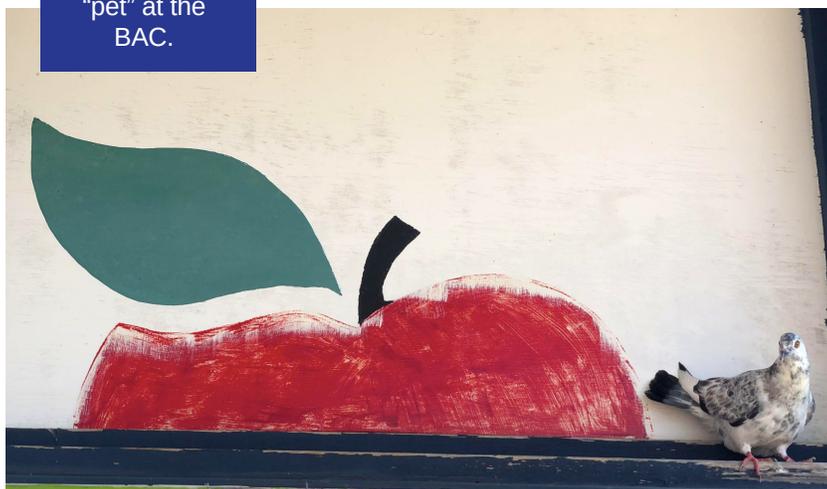

CSA fruit boxes! We pick the freshest fruit for you - any fruit that isn't perfect gets cleaned and frozen for use in our food processing kitchen. In this kitchen, we make an entire line of jams, jellies, fruit butters and fruit mustards. Yes - even mustards! We are proud to say that our apple mustard has somewhat of a cult following!

There is always something going on at the Bayfield Apple Company. You can take a self-guided butterfly walking tour, visit the pigs, and see and learn all about the different ways we grow our crops. A visit to our production area will let you see where we clean and sort all of our apples. Peek into the cider house to see where we make our value-added products and press apples into fresh apple cider. Stop in the Orchard Store that is open year-round - we sell lots of local foods and gifts, including many items from our fellow Bayfield Foods farmers & food producers. If you're ever in Bayfield, we'd love to meet you. If you're lucky, you may be able to meet our newest BAC "pet." Every year, we see a flurry of beautiful birds migrating through Bayfield. Some stop and make nests in our orchard, but rarely does a bird visit our store daily. This summer, we have gained a new best friend/pet, in the form of a pigeon, who continues to return to the BAC store! We see him so frequently, we have named him Einer, after Einer Olson, the original owner of the Bayfield Apple Company.

Thank you again for supporting our orchard and the other producers in our community through the Bayfield Foods CSA. Wishing you all happy eating this week - and a fun & healthy summer season!
